ABOUT US

Commercial vehicle superstructure manufacturing is Yenkar Torunlar Company Union's main focus since 1977. Mixing the mastery in craftsmanship of co-workers, we work together more than 20 years, with young and dynamic engineers' vision, innovation has been our priority ever since. Our target is to increase the added-value in our production and serve our customers with the highest quality materials and products. Fast and effective post sales services to maintain customer happiness is the most important thing in our policy.

QUALITY IN PRODUCTION

Climate conditions, Land transportation conditions, government supervisions are considered before building any product. Vehicle manufacturer company's directives are the most important elements for building a commercial vehicle superstructure.

For each production step we set our quality policies based on the quality management systems in international sectoral standards.

MAXIMUM VOLUME MINIMUM WEIGHT

From 1500Kgs to 3500Kgs in total weight and manufactured with the desired towing capacity. Documented in European Standards and you can license your Yenkar product straight away! Front wall, rear doors, roof and the side walls are all optional. These options are for picking the ideal trailer for your business.

This trailer can be towed with a pick-up truck, panelvan, your personal vehicle and many more. The kerb weight value in your vehicle license, will help deciding the trailer tonnage.

ALUMINIUM CURTAINSIDER TRAILLER

MO DU LAR

Load master truckbody and the load master trailer has the same manufacturing process and both of them have a fully aluminum superstructure. Roof, side walls, front and rear walls are optional in customer demand.
